**RESEARCH PROFILE:**

The candidate has demonstrated sustained engagement in multidisciplinary research spanning human resource management, organizational behavior, leadership studies, healthcare management, workplace psychology, sustainability, and information systems. The research work reflects a strong orientation toward addressing contemporary organizational challenges, with particular emphasis on burnout, stress, leadership styles, employee engagement, digital behavior at work, and social responsibility.

A significant recent contribution includes the systematic literature review titled **"Burnout and Leadership Style in the Health Care Sector",** presented at **INCONSYM 2024 (January 30–31, 2024),** organized by Symbiosis Institute of Business Management. This study critically synthesizes global literature to examine the relationship between leadership styles and burnout among healthcare professionals, offering theoretical insights and practical implications for healthcare leadership and policy formulation. The paper has been accepted for publication in The Learning Organization, a reputed **Q2-ranked international journal, highlighting the scholarly rigor and relevance of the research.**

In the domain of higher education and workplace behavior, the study **"A Review Study on the Role of Cyberloafing on Burnout and Work Engagement of Teachers in Higher Education Institutions (HEIs)",** presented in **December 2020** at **Lovely Professional University, Punjab,** explores the dual role of cyberloafing as both a coping mechanism and a potential productivity concern. The research contributes to the growing discourse on digital behavior, employee well-being, and engagement in academic institutions.

The researcher has also addressed gender and occupational stress, as reflected in the paper **"A Comparative Study on the Role of Stress on Working Women in Medical and Service Sectors",** presented at the **International Conference on Emerging Trends in Business Paradigm (April 2016, Pune).** This study provides comparative insights into stressors faced by women professionals across sectors, highlighting the need for gender-sensitive organizational policies and support systems.

**Another notable contribution is the paper "Efficacy of Career Development Management (CDM) in India", presented at the International Conference on Spirituality and Management (January 2016), organized by Indian Institute of Management Bangalore.** This research integrates management practices with values-based leadership, emphasizing the role of structured career development in employee motivation and long-term organizational sustainability.

The researcher's earlier work reflects strong grounding in corporate ethics, sustainability, and information systems. **The paper "Corporate Social Responsibility: The Era of Today's Business" (2014, Amity College, Noida) examines CSR as a strategic imperative rather than a compliance-driven activity. Similarly, "Human Resource Information System" (2014, Apeejay School of Management)** analyzes the role of digital HR systems in enhancing efficiency, decision-making, and organizational performance**.**
